CURRICULUM DEVELOPMENT

- 2020 - 2021 **B.Arch P3 Research Cluster: Critical Practices**
In collaboration with Assistant Professors Courtney Crosson, Altaf Engineer, and Assoc. Professor Chris Trumble, we developed a series of cohesive course offerings for a P3 capstone research cluster.
- 2020 - 2021 **Master of Science in Architecture: Core Program**
As newly appointed Chair of the Master of Science in Architecture program, I developed an over-arching curricular structure to facilitate multiple concentration areas for student and faculty research. The curriculum is now established with a core research studio, research methods, and research seminar to provide cohesion for the student and faculty cohort involved in this program.
- Fall 2020 **ARC 410f|510f|601: Climate Change and Design Studio**
In collaboration with Associate Professor Susannah Dickinson, we received a CAPLA Grassroots Teaching Grant to support the course development of a new integrated research studio on climate change and design. The course was developed for robust regional travel with an emphasis on the Sonoran Desert across transborder Arizona-Mexico locations, but the first semester of offering was limited in this capacity due to the COVID pandemic. We prepared four course modules with new digital skills and field work research tools and techniques. We provided the students with access to a series of outside guest lectures and workshops. Future developments will include enhanced collaboration with faculty in Mexico.
- Spring 2018 **ARC 521b: Integrated Technologies II**
I worked on developing the course outline, schedule, syllabus, lecture contents, reading selections, and integrated assignments in collaboration with Lecturer Valerie Lane.
- Spring 2018 **ARCE 223: Architectural Engineering - Environmentally Adaptive Systems**
The ARCE 223 course was added as a requirement for the new Architectural Engineering program, and is cross-listed with the ARC 223 course. Special modules for digital tools and skills were developed to assist the ARCE students with different background knowledge to be successful in the ARCE 223 course lab exercises.
- Spring 2017 **AMP EBT: Accelerated Master's Program Emerging Building Technologies**
AMP in Emerging Building Technologies developed for B.Arch/MS.Arch and proposed to School of Architecture in Fall 2016. Approved by UA Graduate College, Spring 2017.
- Spring 2017 **ARC 461i|561i: Material Properties and Tests**
New course development for an ARC 461i|561i Material Properties and Tests upper division elective and core requirement for MS.Arch EBT students. The course encompasses three modules, including material selection and properties, material probes and testing, and material prototypes. The first course offering occurs in Spring 2017.
- Fall 2016 **MS.Arch EBT: Master of Science in Architecture, Emerging Building Technologies**
